

AI Innovation Expo

7 Dec'21 | 13.30 to 16.00 (AEDST)

Register Now!

The fact that AI has gone mainstream has not doused the debate around the dangers of blessing machines with intelligence but fueled it. No discussion on the application of AI is complete without an exploration of its risks and ethical implications. We'll kick off the expo with a debate between two AI entrepreneurs, before we launch into a panel discussion on AI ventures going global.

All this should warm you up for the intense 3-minute pitches by seven promising AI scaleups with world-changing ideas, and growing traction. Enjoy the ride!

boab artificial intelligence

Is the AI existential threat real?

DEBATE

Dr Catriona Wallace, AI ethicist and the first woman to launch an AI company on ASX, debates with Jeremy Howard, AI pioneer who created FastMail and Kaggle:

- *Will the sharing of human intelligence with machines be humanity's undoing?*
- *What is the distance from Automation to Apocalypse?*
- *What is the key to infinite and mutual progress?*

Debaters

Dr Catriona Wallace

Jeremy Howard

Session moderator

Steve Nouri

How to take world changing AI to the world?

PANEL DISCUSSION

Join two serial AI entrepreneurs, a global marketing leader and a Google Cloud executive as they discuss why and how Australian AI startups should take their products to global markets.. Catch them discussing:

- *Should an AI company consider going global?*
- *The challenges in doing business globally and how to overcome them?*
- *How does the AI space differ in Australia vis-à-vis global markets?*
- *What are some of the key skills needed when expanding globally?*
- *How does Google Cloud support businesses to drive AI innovation?*
- *How did the doers get there, and what can be learnt from those who didn't make it in one go?*
